## About

I worked as a UI Developer at Jotform, a software company with more than 25 million users. I was part of the Product team, where I helped develop and launch features like Push Notification, Copilot, and User Management for the No Code App Builder. I also worked on the Email Agent feature in the Jotform AI project and created email templates.

I worked closely with designers to build frontend solutions using React, Redux, Styled Components, and CSS/SCSS. I focused on making clean, scalable, and user-friendly interfaces.

Outside of my professional work, I have built and launched my own websites that can create passive income. These projects helped me learn more about building complete and scalable web applications.

Now, I am looking for new opportunities where I can use my frontend skills, continue improving myself, and help create better digital products.

## Work Experiences

### Jotform - UI Developer

21.08.2023 - 30.04.2025

Developed new features such as Push Notification, Copilot, User Management, and Email Agent. Created dynamic email templates for automated communication. Improved user-facing functionalities and fixed bugs to enhance product quality.

React Redux HTML CSS/SCSS JavaScript Styled Components Figma for dev Git / GitHub Slack Notion

### Jotform - UI Developer (Part Time)

01.11.2022 - 03.07.2023

Using HTML, CSS, JavaScript, and React, I helped identify and fix issues in Jotform products, improving the user experience.

React HTML CSS/SCSS JavaScript Git / GitHub

### Jotform - UI Developer Intern

01.08.2022 - 26.08.2022

I developed several web projects using HTML, CSS, JavaScript, and React.

React HTML CSS/SCSS JavaScript Git / GitHub

### Gali Medya - Web Developer (voluntary)

02.08.2021 - 10.09.2021

During my voluntary internship, I created corporate websites using WordPress and made CSS modifications to improve the themes.

Wordpress HTML CSS JavaScript PHP

### Freelancer

Since university - Still

I developed many corporate websites using HTML, CSS, JavaScript, PHP, and MySQL, generating income from these projects. I improved my project management and communication skills.

HTML CSS JavaScript PHP MySQL Tailwind Bootstrap

## Projects

### Personal Portfolio

You can review all my experiences, projects, works, and skills.

Old version: [yasinakbulut.dev](https://yasinakbulut.dev)

### Customer Tracking System

A system with many features that allow dietitians to manage their customers more easily and quickly, write diets, and perform graphic analysis.

Sertifica: [ICONDATA'22](#)

[Shopier](#)

### CV Creation and Customization

A CV creation system that offers many customization options such as templates, colors, fonts, languages, and themes.

### Business Directory Site

A website hosting 250+ business in 140+ categories, for which I did full stack coding.

### Software Developers Community

@kod\_satirim is the blog site that I once used and shared about the software, which I developed as Full Stack for my instagram page.

### Consulting Site With Virtual Pos

A website offering services in E-Commerce, Social Media, and dropshipping. It uses iyzico infrastructure to sell packages and receive payments.

### Personal Portfolio for Dietitian

A personal website specially designed and developed for a dietitian, who provides online diet services.

### Calendar App

A dynamic calendar app developed with React, allowing users to take, edit, and customize notes on specific dates.
