About

Frontend Developer with experience in building **scalable** and **maintainable** user interfaces using technologies such as **React**, **Next.js**, **Redux**, **Saga**, and **Styled Components**. Skilled in translating **design systems** into clean, intuitive interfaces and delivering consistent user experiences across platforms.

At Jotform, a platform serving over 25 million users, I worked as part of the **Product team**, contributing to key features like **Push Notification**, **Copilot**, and **User Management** for the **No Code App Builder**, within a **monorepo architecture** shared across teams. I also took part in the development of Jotform AI Agents, creating dynamic email templates.

Outside of my professional role, I built and deployed personal web projects that generate passive income and strengthened my skills in end-to-end, scalable web development.

I'm currently seeking new opportunities as a Frontend Developer, where I can apply my expertise, grow further, and contribute to impactful digital products within collaborative teams.

Work Experiences

Jotform

• UI Developer

08/2023 - 05/2025

Worked within the Product team to improve user experience by refining features and contributing to new functionalities in Jotform's core platforms, using a Remote Development System (RDS).

Participated in the development of international landing pages as part of the Growth team, focusing on optimization and localization for global users.

React Redux Saga HTML CSS/SCSS JavaScript Styled Components Figma for dev Git / GitHub Monorepo RDS Notion

• UI Developer (Part Time)

11/2022 - 07/2023

Using HTML, CSS, JavaScript, and React, I helped identify and fix issues in Jotform products, improving the user experience.

React HTML CSS/SCSS JavaScript Git / GitHub RDS Axios

• UI Developer Intern

08/2022 - 09/2022

Developed several web projects using HTML, CSS, JavaScript, and React.

React HTML CSS/SCSS JavaScript Git / GitHub

Gali Medya • Web Developer (voluntary)

08/2021 - 10/2021

During my voluntary internship, I created corporate websites using WordPress and made CSS modifications to improve the themes.

Wordpress HTML CSS/SCSS JavaScript PHP

Freelancer

Since university

I developed many corporate websites using HTML, CSS, JavaScript, PHP, and MySQL, generating income from these projects. I improved my project management and communication skills.

HTML CSS/SCSS JavaScript PHP MySQL TailwindCSS Bootstrap PhpMyAdmin cPanel

Projects
