About

I worked as a UI Developer at Jotform, a platform serving over 25 million users. Within the Product team, I contributed to the development and deployment of key features such as Push Notification, Copilot, and User Management for the No Code App Builder, working within a monorepo architecture shared across multiple teams. I was also involved in the Jotform AI Agents product, where I created dynamic email templates.

I collaborated cross-functionally with designers to deliver intuitive, scalable, and maintainable frontend interfaces using React, Redux, Styled Components, and SCSS.

Outside of my professional role, I built and deployed personal web projects that generate passive income and strengthened my skills in end-to-end, scalable web development.

I am currently seeking new opportunities to apply my frontend expertise, grow further, and contribute to impactful digital products.

Work Experiences

Jotform

· UI Developer   21.08.2023 - 30.04.2025

Worked within the Product team to improve user experience by refining features and contributing to new functionalities in Jotform's core platforms, using a Remote Development System (RDS).

Participated in the development of international landing pages as part of the Growth team, focusing on optimization and localization for global users.

`React` `Redux` `HTML` `CSS/SCSS` `JavaScript` `Styled Components` `Figma for dev` `Git / GitHub` `Slack` `Notion`

· UI Developer (Part Time)   01.11.2022 - 03.07.2023

Using HTML, CSS, JavaScript, and React, I helped identify and fix issues in Jotform products, improving the user experience.

`React` `HTML` `CSS/SCSS` `JavaScript` `Git / GitHub` `Axios`

· UI Developer Intern   01.08.2022 - 26.08.2022

Developed several web projects using HTML, CSS, JavaScript, and React.

`React` `HTML` `CSS/SCSS` `JavaScript` `Git / GitHub`

Gali Medya · Web Developer (voluntary)   02.08.2021 - 10.09.2021

During my voluntary internship, I created corporate websites using WordPress and made CSS modifications to improve the themes.

`Wordpress` `HTML` `CSS/SCSS` `JavaScript` `PHP`

Freelancer   Since university

I developed many corporate websites using HTML, CSS, JavaScript, PHP, and MySQL, generating income from these projects. I improved my project management and communication skills.

`HTML` `CSS/SCSS` `JavaScript` `PHP` `MySql` `TailwindCSS` `Bootstrap` `PhpMyAdmin` `cPanel`
