About

I develop modern, high-performance, and scalable interfaces using **React.js, Next.js, TypeScript, JavaScript, and jQuery**. I build strong UI foundations with **HTML, CSS/SAAS, Styled Components, TailwindCSS** and various **UI libraries**.

I manage global state with **Redux Toolkit, Saga, Zustand, and Context API**.

I have experience with **RESTful API** integrations, **JWT** authentication, **Git** version control, **CI/CD** pipelines, **PWA** development, **monorepo** structures, **UI/UX** improvements, **pixel-perfect UI** and reusable component architecture.

I am experienced in teamwork, agile methodologies, sprint cycles, and task management. In addition to my professional work, I build **personal SaaS projects that generate passive income**, giving me end-to-end product development experience.

Experiences

Movasoftware • Frontend Developer

04/2026 - still

I lead the company's frontend development efforts, building scalable applications with React, Next.js, and TypeScript while contributing to technical decisions, code reviews, REST API integrations, performance optimization, and user experience.

Hogarth • Frontend Developer

07/2025 - 04/2026

I have actively worked as a freelancer in the development, localization, and project management processes of responsive, UI/UX-driven, and SEO-compliant web interfaces for projects belonging to global WPP brands.

Jotform

• Frontend Developer

11/2022 - 05/2025

I worked in the **Product** team at Jotform, a company serving over 25 million users. I contributed to projects such as **No Code App Builder, Push Notification, Copilot** and **User Management** within a shared **monorepo** architecture across multiple teams.

I developed user-focused, pixel-perfect interfaces and worked on UI/UX improvements, bug fixing and component architecture.

• Intern Developer

08/2022 - 09/2022

I worked on Frontend Development and component-based structure in various web projects using React.js, HTML, CSS, and JavaScript.

Freelance Full Stack Developer

During University

I developed many websites using React.js, Next.js, Redux, Redux-Saga, TypeScript, JavaScript, HTML, CSS, PHP, and MySQL. In these projects, I gained experience in RESTful API integration, UI/UX development, database management, project planning and client communication.

Skills

Frontend: React.js Next.js JavaScript TypeScript jQuery HTML5 CSS/SCSS Bootstrap
TailwindCSS Styled Components UI Libraries React DevTools Lighthouse

State Management: Redux Redux Saga Zustand Context API

Backend & API: RESTful API Integration Supabase Axios JWT JSON Postman MySQL PHP (PDO) PhpMyAdmin

Build & Deployment: Git / GitHub GitHub Actions CI / CD Unit Test Monorepo PWA NPM RDS cPanel Vercel

Soft Skills: Agile / Scrum Methodology Claude Code / Codex Problem Solving Team Working Jira / Notion

Projects

Personal Portfolio

You can review all my experiences, projects, skills, and blog articles on my website.

[yasinakbulut.dev](#)
