ABOUT

Frontend Developer with 4+ years of experience building products used by millions.

I specialize in **TypeScript**, **Next.js (SSR/SSG/ISR)** and **React**, state management with **Redux Toolkit & RTK Query**, and UI development with **Tailwind CSS & Shadcn**.

I care deeply about Core Web Vitals, accessibility, and shipping pixel-perfect, mobile-first interfaces. I have experience with **RESTful API** integrations, **JWT** authentication, **Git** version control, **CI/CD** pipelines, **PWA** development, **monorepo** structures and reusable component architecture.

I am experienced in teamwork, agile methodologies, sprint cycles, and task management. Alongside my professional work, I design, build and ship my own **SaaS** and **mobile** products **end-to-end**.

EXPERIENCES

Movasoft - Frontend Developer - 04/2026 - still

I lead Frontend development for the company's CRM & CMS projects, building scalable applications with Next.js, TypeScript and React while contributing to technical decisions, code reviews, REST API integrations, performance optimization, and user experience.

Hogarth - Frontend Developer - 07/2025 - 04/2026

Delivered responsive, SEO-optimized, multi-language web experiences for global WPP brands. Implemented static generation and i18n, ensured cross-browser compatibility, and worked directly from Figma designs to production-ready code.

Jotform - Frontend Developer - 11/2022 - 05/2025

I worked in the **Product** team at Jotform, a company serving over 25 million users. I contributed to projects such as **No Code App Builder**, **Push Notification**, **Copilot** and **User Management** within a shared **monorepo** architecture across multiple teams.

I developed user-focused, pixel-perfect interfaces and worked on UI/UX improvements, bug fixing and component architecture.

Jotform - Intern Developer - 08/2022 - 09/2022

I worked on Frontend Development and component-based structure in various web projects using React.js, HTML, CSS, and JavaScript.

Freelance Full Stack Developer - 06/2020 - 07/2022

I developed many websites using React.js, Next.js, Redux, Redux-Saga, TypeScript, JavaScript, HTML, CSS, PHP, and MySQL. In these projects, I gained experience in RESTful API integration, UI/UX development, database management, project planning and client communication.

SKILLS

Core: Next.js (App Router, SSR, SSG, ISR), TypeScript, React.js, JavaScript, HTML5, CSS/SCSS

UI & UX: Tailwind CSS, shadcn/ui, Styled Components, Figma, Design Systems,
